SUPPLEMENT TO 25X1X
REPORT NO.

1. The principal seeds used in Rumania for the manufacture of edible oils are sunflower seed and rape seed. These seeds are collected by the state company Comcereal and are distributed to various factories according to instructions received from the Ministry of Internal Trade. The oil produced is then distributed domestically by the Societatea de Stat Alimentară (The State Alimentary Company) and that which is to be exported is handled by the state company known interchangeably as Alimentexport or Prodexport.

2. The principal factories producing edible oil in Rumania are as follows:

a. Bucharest

The Filimon Sârbu factory formerly Phoenix, situated close to Gara Filaret. This factory works continuously and produces fifty tons of oil daily. The 13 Decembrie factory, formerly Assan, situated close to Gara de Est. This factory works continuously and produces ten tons of oil daily. The Biruinta factory, formerly Hermes, situated near Gara de Est. This factory works continuously and produces ten tons of oil daily.

b. Constanta

The Argus factory, situated on Soseaua Cerealelor, produces five tons daily.

c. Braila

The factory formerly known as Sesanof, present name unknown, produces five tons daily, situated close to the railroad station. The factory formerly known as Fratii Verona, present name unknown, situated on Strada Transilvaniei, produces five tons daily.

d. Galati

The Prutul factory, formerly Fleming, situated at Bădălan (sic), produces ten tons daily. The Etna factory has a capacity of ten tons daily but is not presently working.
